

NEW STSC series Self Cleaning Strainer

- Alternative to expensive auto-cleaning system
- Continuous Flow
- Maintenance free
- Low Pressure Drop

Water flow through the conical screen internal, blocking the particle that are larger than screen opening and the debris is effectively forced to the bottom reservoir to be removed by purging through the flush port.

Specification-

- Size available from 2" to 8"

2" Unit – 100 gpm

3" Unit – 200 gpm

4" Unit – 350 gpm

- 6 / 10 Bar design pressure choices

- For Particle removal of up to 75 microns

- Material Construction – 304/316

- ANSI/DIN/JIS Flange or NPT coupling connection
