

## Pleated Filter Cartridge – UMFF Series

For low pressure drop, more surface area and long service life

Universal MFF Pleated Filter Cartridge, designed for most demanding application that give s you superior flow characteristic with low pressure drop.

It is a multi-layer pleated type filter with large surface area , support with PP core.

These features make it more reliable and economical than the conventional type of cartridge.

Materials available for are in Polypropylene , polyester and glass fiber medium.

Available in standard 68 OD

### Features

Large surface area ensures long service life and low initial pressure loss

### Specification

Length – 10”, 20”, 30” and 40”

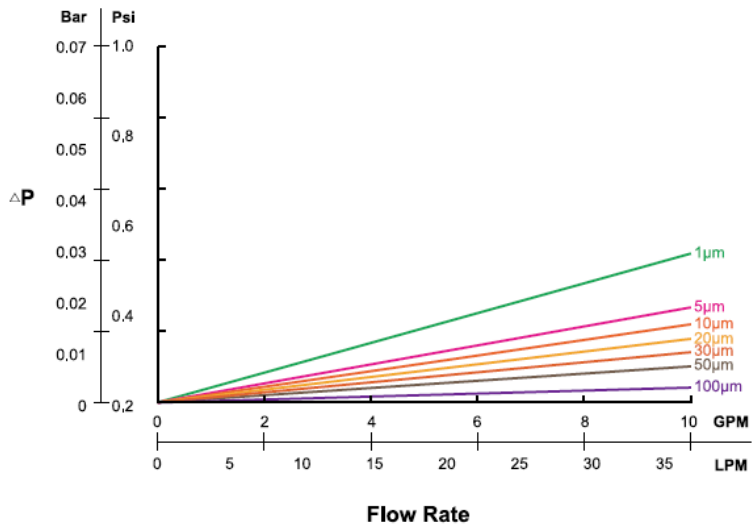

OD – 68 mm

Material used :  
Polypropylene, Polyester or glass fiber

End Cap – Silicone, EPDM or VITON

Micron rating available :  
1, 5, 10, 20, 30, 50, 100

### Performance Chart

How to order

**Filter Cartridge Code UMFF – PP - 1 – 10 - M**

Material  
PP, PES, GF

Rating  
1, 5, 10, 20, 30, 50, 100  
micron

Length  
10-40"

Configuration  
DOE , SOE 222 type
